Excellent casual game. Really addictive. You're a knight who has to create shapes inside a giant rectangle. Once you see it in action, you know what sort of game this is. I'm sure everyone has played a clone of this game at least once in his/her life. In fact, know the old Snake game (no, not Metal Gear Solid, you fool) ? The gameplay is similar to this game, except this is a bit more feature packed. Excellent graphics, good music, addictive gameplay.. Fortix 2 improves upon the arcade-strategy formula of the original Fortix, and adds a few new twists to the gameplay. The new game has maps that really force you to rethink your gameplay style. Fortix 2 also features a better menu interface. One that is comfortable to use on the PC - a problem that the first game had. Fortix 2 includes the maps from Fortix, although gameplay is subtly different in this version (specifically: the way that you capture castles has changed). The first game gives you a lot of gameplay for just \$0.99, but if you like, you can skip the original and play its levels in Fortix 2. Good game! I really enjoy playing this.. Fortix 2 Review - Raymond K. Turcotte When i first saw Fortix 2, i was dissapointed for many reasons. The Graphics were different, it's too colorful and it looks like a childs game. Now that i have returned to it, and avoided my previous opinion of the Game. It's somewhat enjoyable. It's not half bad

---

actually. I like the fact that you can actually "Run" in this game rather than the first one. They also added keys, shields and New power ups. I understand that a "New" company took it over, 'I get it', i'm just a little sad about that. I love the first one, but not so much the second one. I myself wouldn't recommend this game. But i'm gonna say if you bought Fortix 1 first you will have the same opinion as me. But hey' it's decent I recommend this, if you haven't played the first one. If you have, you won't want to play this.. Older gamers will recognize Taito's Qix. and this is a good thing. Add all that story icing, mild inverted tower defense and colorful graphics and you got a nice game for only 1.99\$. sweet deal if you consider there are trading cards and achievements as well.. A remarkably upgraded Fortix version. It has very good and improved graphics, some new mechanics and clever achievements. Also a Zombie Mode! C'mon, how can a game be without a zombie mode these days :D Well, it's pretty hard on further levels as those zombies spawn as hell. In overall good and pleasant area capturing game.. This is quite the little gem here. It being one of the cheapest games on steam with trading cards I bought it thinking I would just get the cards and uninstall it into the deep unknown realms of my game library. However out of boredom (and a lack of internet connection or power) I gave it a shot and I must say this truly a fun game. At first I was like DA FUQ ARE THESE CONTROLS, AINT NO ONE GOT TIME FOR DAT. But then I switched the controls to keyboard and it was much better and I recommend anyone who plays this to use the keyboard instead of mouse. As soon as I got the hang of it I was hooked. Yes the graphics are 2D and not anything worth mentioning but it played very smooth and the controls were very responsive. The goal of the game is like a reverse tower defense; you have to destroy turrets and capture land by creating squares of land until you reach the turrets. Along the way (higher levels) things such as dragons and bats are introduced which invoke a feeling of "u2665u2665u2665u2665 I thought I was good at a game for once" or "Damn u2665u2665u2665u2665u2665 I JUST ATE". But let me tell you that as annoying as these u2665u2665u2665u2665ers are (particularly bats), they add a lot more dynamic gameplay to the game. 1st hour of playing I liked it. 2nd hour of playing I loved it 3rd hour my u2665u2665u2665u2665u2665 was out and hard 4th hour Cops called, I left my shades up while masturbating vigorously.. Simple, yet challenging. Addictive in an old school tetris kind of way. Definitely worth a couple bucks. Just don't click the High Scores page as it instantly crashes to desktop.. Older gamers will recognize Taito's Qix. and this is a good thing. Add all that story icing, mild inverted tower defense and colorful graphics and you got a nice game for only 1.99\$. sweet deal if you consider there are trading cards and achievements as well.
