Essentially 4 entirely different characters packaged as 1. Sektor, Cyrax and Smoke have all of their classic moves, whereas Cyber Subzero is fun, but more of a novelty imo.. It got lots of updates and new game modes. It's a nice little game.. I really love this game. it gets my mental process going, and I get smarter with each level completed!. Only bought it to support developer. Not sure if its any use really.. LETS DRAW XDDDD. really great game for 31 cents , its also not really easy , got really challenging at the end

SO fun! you should toatlly add 2 thing:

1: option to control more than 1 train!

2:disable smoke option!. Thank you for making the exit game button work.. could've been good, But Was Not.. A cute little interlude for the coming main attraction: Blackenrock.

Well worth the low price.. love the game!!!!. Controls are bad. Sound is bad. Its just not that good of a game.. This games is awesome! It felt like I was watching a movie play out right in front of me. Great story too with some good twists and supprises. I hope we see more games like this.
